WILLMOTT DIXON
SINCE 1852

| Our impact, Our Legacy

Sustainability is at the heart of our business. Since 1852 we have been passionate about leaving a positive social, environmental and economic legacy. Being sustainable helps us protect our own future against resource scarcity. It enables us to attract and retain good people. It means we can create whole life value for our customers and partners, and for the users of the buildings we construct.

Our purpose goes beyond profit. Creating value for our communities is something we passionately believe in, and we strive to constantly find new ways to improve social mobility in communities local to our projects and contracts.

> *As a privately-owned company, being a positive force to deliver social cohesion and provide lifelong opportunities for people is important for Willmott Dixon, especially for myself as the fifth generation to lead the company. I am proud of the difference we make through the fantastic efforts of our people.*

Rick Willmott | Group Chief Executive

| Project Brief

Willmott Dixon's team of car park superstructure experts were appointed by Winchester City Council for the design and construction of a 287 space multi-storey car park on the site of the old Vaultex warehouse facility, adjacent to Bar End Road Park & Ride.

The structure includes 800m^2 of roof-mounted solar panels, generating enough power to charge the 16 Electric Vehicle (EV) charging points as well as the lighting, lifts, CCTV and other electrical systems in the building. Further EV charge points can be added as demand grows, further underscoring the Council's commitment to encouraging alternatively-fuelled and low-carbon modes of transport.

The project has been delivered by Winchester City Council in partnership with Willmott Dixon and Enterprise M3 Local Enterprise Partnership (EM3 LEP) who has provided £5.65m of grant funding.

Customer | Winchester City Council
